

(Unclassified // FOUO)

CSWC Operational Period Summary

1800 December 27 2017 to 0600 December 28 2017

Tiny bark beetles have killed millions of trees in the Sierra- today, traffic was blocked briefly on Highway 4 in Arnold (Calaveras County) while a Caltrans tree crew removed a giant ponderosa pine to protect public safety and keep the road open. All lanes clear.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

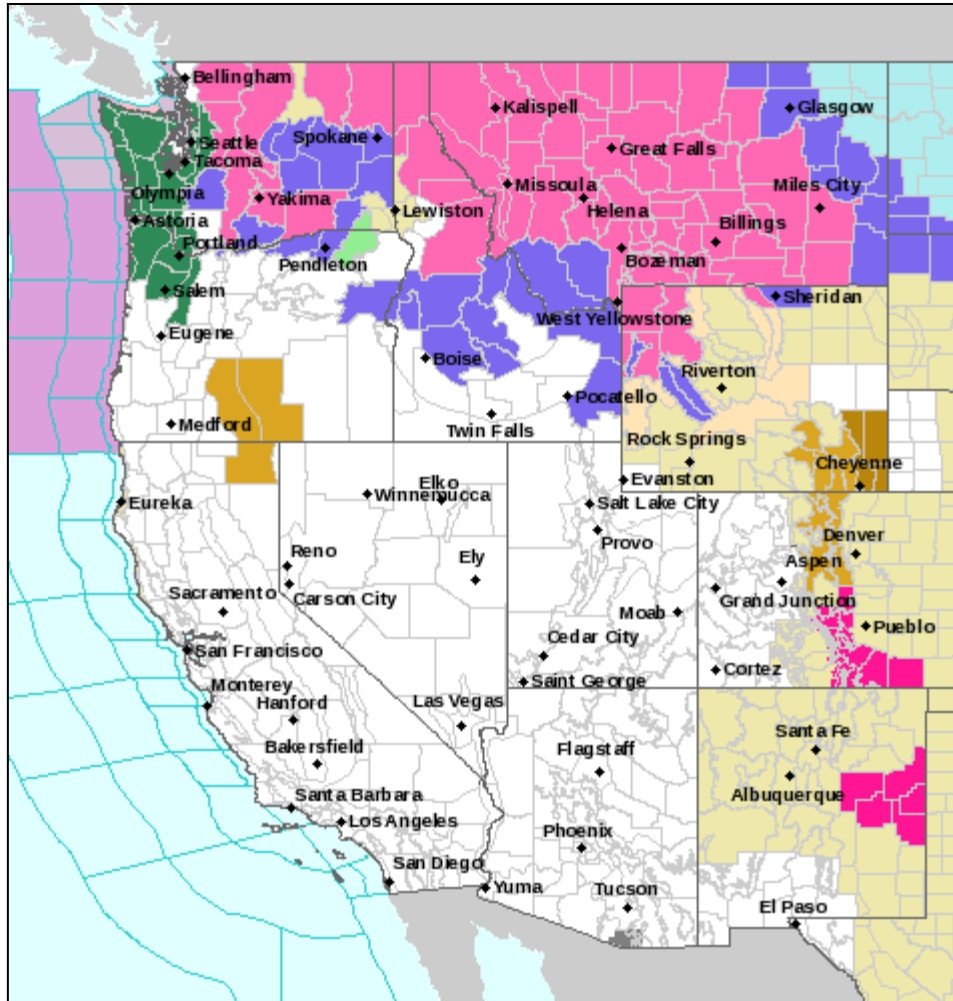

High pressure will produce dry and mild weather throughout the region until Friday afternoon. Late on Friday the high will weaken and move south as a winter weather system moves through the Pacific NW. The tail end of the cold front associated with the system will move into the far northern end of the region Friday evening and produce scattered light rain and mountain snow showers north of a line from Cape Mendocino to Alturas through Saturday afternoon. S-SW winds will gust to 25-35 mph over the higher terrain and from the Cascade-Sierra crest east Friday night and Saturday. Light (gusts to 25 mph) N-NE downslope surface winds are expected early Sunday, but they will die off in the afternoon. Computer models are now showing an offshore low pressure area becoming the main influence on the region's weather beginning Monday. The low will push warm moist air into the region from the SW, producing isolated to scattered mountain showers and occasional SE-SW breezes through Wednesday. There is a chance that the showers will increase over the area beginning Thursday.

SOUTHERN CALIFORNIA

A strong ridge of high pressure over California will cause temperatures to be 10 to 20 degrees above normal through Friday, with 60s to low 70s across the mountains and San Joaquin Valley and mid 70s to mid 80s in the coastal valleys. The ridge will weaken bringing around 5 degrees of cooling each day this weekend. Temperatures will then warm a couple of degrees each day early next week as the ridge of high pressure strengthens a little. Minimum humidity will be mainly in the single digits and teens away from the coast and San Joaquin Valley through Saturday and then humidity will increase Sunday through early next week. Winds will be light across the entire region through early next week.
